		seriously? Putting it down to anxiety is not helpful and actually increases anxiety as well as morbidity and mortality How dangerous is it? What does the		
		mean for my baby? How long does it normally take for blood pressure to stabalise after birth? What increases the risk of high bp during pregnancy?		
		What are the best ways to help keep blood pressure down in pregnancy? What is preeclampsia? What harm can it do to baby and mother? What		
		monitoring will I have? What are the common sides affects of pre eclampsia after birth? I would of liked to have known the importance of having your		
		blood pressure taken during pregnancy. What is the difference between high blood pressure in pregnancy, toxaemia of pregnancy and preeclampsia?		
		How can I reduce my blood pressure in pregnancy? Could I have done anything to prevent HELLP syndrome? Can women have doctors inform them of		
		all the risks that we must be aware of and what to do after a high risk pregnancy to reduce our higher risks and refer us for follow ups for the yrs to		
		come. Does it have an effect on the baby? How will this affect the Baby? What advice can be offered to women who have experienced high blood		
		pressure due to pre-eclampsia in one pregnancy who want to go on to have more children? What is HELLPS? Has research identified women who migh		
		be prone to high blood pressure in pregnancy? How early can you get pre eclampsia in the pregnancy? How dangerous is high BP in pregnancy? What		
		symptoms should I/we be looking for as an alarm? I would like to know why my BP is not regularly monitored throughout life after having had severe		
		pre-eclampsia, 2 x post partum pre-eclampisa and then high blood pressure in pregnancy. Am I more likely to develop high blood pressure as I get olde		
		as I had it during my pregnancies? What exactly are the continued risks of this, and prognosis for the future? Why is high blood pressure an indicator of		
		pre-eclampsia? Will I suffer from high blood pressure later in life after suffering with it in pregnancy Detailed explanation of tests required. How can I		
		identify when I have high blood pressure? During my first pregnancy I always had high blood pressure, which unfortunately resulted in preeclampsia.		
		However was considered a normal side effect up until things became serious. Why isn't a high BP considered abnormal? What/will this have an effect		
		on the baby. Are certain age groups more vulnerable to getting high blood pressure? What more could I do to help my blood pressure? Not just the tak		
		the drugs and relax. At what point does blood pressure tend to be noticed as increasing.? What are the risks of developing hypertension later in life		
		following pre-eclampsia? Are there signs that should alert women they may have high blood pressure (including after birth)? Is it likely to harm the		
		baby? If you have experienced high blood pressure and pre-eclampsia in a first pregnancy, are you monitored closer in any future pregnancies? Is it		
		right that my mum had it so I have more of a chance of getting it? Why do so many Obstetricians still not really understand Hypertension in pregnancy		
		or why blood pressure can go up postnatally. Why is there such a difference in the way that medical professionals treat you when you have pre		
		eclampsia and high BP? I was lucky and I was very happy with my care but on the forums there is such a difference with treatment across the Uk? Why	1	
		Why isn't there a nice guidance/ standard policy of care? How can I try and reduce risk in future pregnancies? What recent info do you have on		
		r preclampsia and why it happens? Is the impact of medication clearly explained? I was pretty much told you're risking your baby and you dying unless		202 women, 8 who knew a person/relative/friend with pregnancy hypertension

		is your normal blood pressure so we can measure what you call normal What symptoms should I/we be looking for as an alarm? How can midwives		
		provide better care in diagnosing blood pressure problema throughout the pregnancy? Detailed explanation of tests required. How can I identify when I		
		have high blood pressure? Are there signs that should alert women they may have high blood pressure (including after birth)? How can blood pressure		
		best be monitored and problems identified during pregnancy If you have experienced high blood pressure and pre-eclampsia in a first pregnancy, are		
		you monitored closer in any future pregnancies? What can midwives and doctors do to help spot signs of increasing blood pressure early and then keep		
		it down Should all first time mothers be screened for symptoms? What care/monitoring is put in place for a women experiencing high blood pressure in		
		current and future pregnancies -being a woman who developed HELLP syndrome rapidly with no information provided on how I will be monitored in		
		future pregnancies, this is a very important question what reading means it's high? Is it good practice for patients to monitor and take their own blood		
		pressure at home What is a doppler What is the best way to monitor BP? As there is an element of white coat syndrome when checking my blood		
		pressure, is there a better way to measure bloods pressure without the cuff and the noise? Why is blood pressure not monitired more closely in		
		pregnancy? Should mothers with known PIH ever have electronic BP measurements v manual? Could women check their own blood pressure?		
		Particularly after birth. What it is the optimum way to manage gestational hypertension post discharge (during the postnatal period) to avoid severe		
		hypotension Can we improve prediction, monitoring and treatment of HIP and pre eclampsia What ongoing monitoring should be done for those		
		diagnosed with high BP after resolved ea annual checks mandatory etc A less intrusive way for regular obs? Why was I told so much false information		
		about hypertension, eg that delivery is the 'cure' and no information on the long term health effects of hypertension? What is the best treatment? How		
		losely should women with gestational hypertension bday monitored in subsequent years Are women with ore eclampsia monitored after birth? Are		
		there specific ways of managing pregnant women who have had a previous pregnant years are women with one examination and are minimal there specific ways of managing pregnant women who have had a previous pregnanty hypertension to make later pregnancies safer? Does everyone		
		need medication after to stabilise bp How can I be better monitored during another pregnancy to catch it earlier Why was my wife's high blood		
		pressure not detected in pregnancy? why if my wife had stillborn baby at 36 weeks through eclampsia was she not monitored closely again in 2nd		
		pregnancy for signs if high blood pressure and protein in urine? Symptoms other than oedema, headaches and visual disturbances that should be		
		looked for, so many pregnant women have the above without hypertension definition for different types of high blood pressure When a woman has		
		been diagnosed with PET, with a raised urine PCR, is there any benefit in repeating this test as a marker of disease severity? How often should I see a		
	L	women with Chronic hypertension And Complications of chronic hypertension in her pregnancy? If a woman in her first pregnancy didn't get raised		
	What is the optimal monitoring strategy for women before,	BP until 36 weeks for example is this the point we need to start monitoring regularly or does it make no difference is it pre-eclampsia How can we		
	during and after pregnancy hypertension (including in	improve the postnatal management of hypertension? Can you identify high risk women What pathways of postnatal care and follow up will improve		34 women, 2 who knew a person/relative/fried with pregnancy hypertension, 12
sum_qn_26	subsequent pregnancies)?	long term health outcomes for women with high blood pressure in pregnancy. gold standard post natal management of PIH How best to predict both		healthcare, 1 researcher, 3 other
		Does having high blood procesure have any impact on the unbern baby? What increases the side of black have desired as a second of the barby?		
1		Does having high blood pressure have any impact on the unborn baby? What increases the risk of high bp during pregnancy? what harm can it do to		
		baby and mother is there anything that can prevent / reduce risk high BP Does it have an effect on the baby? who gets it Am I more likely to develop		
		high blood pressure as I get older as I had it during my pregnancies? My blood pressure was normal but at 32 weeks went sky high and to 'fullminating'		
		pre-eclampsia why? What can cause high blood pressure? Are certain age groups more vulnerable to getting high blood pressure? Is it likely to harm the		
		baby? Labor is a big stressor on the body, doesn't it make sense that high blood pressure might happen/ what makes it so dangerous if once the labor is		
		done the stress is gone and pressure drops? Is it right that my mum.had it so I have more of a chance of getting it Possible Signs and symptoms of high		
		blood pressure Do you feel this blood pressure is normal for you Early indicators that BP is rising What can prevent pre eclampsia is there a link with		
		familial hyperlipidaemia? How do I prevent this from happening? Does age increase likelihood of suffering with high blood pressure? What causes the		
		high bp? How does this affect me Does it mean it will happen in subsequent pregnancies What is classed as a dangerous high blood pressure and can it		
		be prevented What are the risks to baby/me? Is it more common in pregnancy if having twins? Is it dangerous Is there a link to obesity? What level of		
		care provides best outcomes for mum and baby? Is suffering form high blood pressure hereditary in pregnancy How many pregnancies are lost due to		
		high blood pressure? is age a factor Do the fathers have any contribution to their partners risks of developing high blood pressure during pregnancy?		
		Does pre-eclampsia cause IUGR babies? What are the risk factors? Who is at risk Are there an increasing number of women suffering from hypertension		
		in pregnancy and how if so how can I educate them in personal health to enable it being less a risk? Any sex predilection for IuGR and HDP? How often		
		does pre-eclampsia result in c/section? Is hypertension in pregnancy increasing or decreasing in frequency? Is it worth getting pregnant whilst you have		
		high blood pressure? At the age of 34 Does my daughter run the risk of same condition? (My mother had high blood pressure during pregnancy		
		although I was OK but she didn't have eclamsia) What makes me at risk to high blood pressure? how best to (and when) communicate about blood

		What are the long term implications of pre-eclampsia on Maternal health if blood pressure returns to normal levels following birth? What exactly are		
		the continued risks of this, and prognosis for the future? Why does pre eclampsia continue after birth? What effect will very high blood pressure during		
		pregnancy have on my body in the future? What does the recent research link between preeclampsia and vascular dementia in later life tell us about		
		placental blood flow, if anything? I myself had pre eclampsia 7 months ago with my twins and I am still getting high blood pressure why does this		
		happen Why does high blood pressure continue to increase after delivery What is the long-term impact of premature birth on the mother-child bond/		
		attachment, & social/emotional development? (My son has been very difficult as a child & I believe being effectively neglected in hospital for the first 5		
		weeks of his life while I recovered from PE had a detrimental impact on both of our mental health in the long term. The focus was on our physical well-		
		being, with not a single consideration given to our emotional well-being) What impact might my illness have on my daughter long term, and any future		
		children? Will my child suffer from high blood pressure after being born through elective caesarian at 32 weeks for pre-eclampsia Will my daughters be		
		at rush of high blood pressure? why after pre eclampsia doesn't blood pressure just go back to normal for some people? Why do symptoms continue		
		after the baby is delivered and is that consistent and predictable across different women? Are risk factors for developing high blood pressure		
		postnatally same as for antenatal? How does maternal hypertension influence neonatal vascular development Why are both mother and child at risk of		
		CHD and how will they be monitored after pregnancy? What are the mechanisms for the increased risk cardiovascular disease in later life after		12 women, 1 who knew a person/relative/friend with pregnancy hypertension, 2
sum_qn_39	a woman and her child?	hypertension in pregnancy?		healthcare, 2 researcher
		What lifestyle factors, if any, have an effect on pregnancy hypertension and how can these be effectively communicated pre-conception and during		
		pregnancy? What could I do myself to try alleviate it when it was happening? What more could I do to help my blood pressure? Not just the take the		
		drugs and relax. because I do not fit any of the typical sterotypes for the kind of women who would suffer with hypertension I was not taken seriously		
		when I reported problems that I was starting to have, eg suffering from extreme thirst, very swollen legs/ankles/hands/face, 'floaters' or spots in my		
		vision - why was this? Can I monitor my own blood pressure at home If there is a history of pre-eclampsia is the first pregnancy, how can the risk in		
		subsequent pregnancies be reduced (e.g. pre-conception lifestyle, medication, aspirin in early pregnancy etc.)? I want to know ways to lower blood		
		pressure not just by taking meds I want to know ways to lower blood pressure not just by taking meds Is bedrest or taking it easy really the best thing?		
		Exercise reduces blood pressure so why are we told to rest. Does your food affect your chances? Are women aware of the importance of monitoring		
		blood pressure in pregnancy? What could have prevented high Blood pressure in my pregnancies Could diet and lifestyle pre pregnancy and during help		
1		keep blood pressure managed? are women aware that not all salt is the same; ie most salt in bought food and off the shelf is pure sodium and stripped		
1		of all other complementary minerals, himalayam salt on the other hand has over 80 other trace minerals to work synergistically with sodium and there		
1		are robust studies that demonstate himalayan salt actually reduces blood pressure and may be implicated in better placental development How can a		
		pregnant woman with PIH be helped in pregnancy How best to care for women with moderate to severe hypertension in the antenatal period? Are		
1		there any non-pharmacological methods to control/reduce high BP? Aside pharmacotherapy what other methods can a pregnant woman be cared for

	50	What are the long-term consequences of pre-eclampsia for the woman and baby? What are the long term effects of pre-eclampsia on mental health? How can we predict complications of pregnancy	What does this mean for my baby? How long does it normally take for blood pressure to stabilise after birth I had pre eclampsis. What are the long term eefects of high bp and what should I be doing as preventative treatment / measures/ lifestyle for my future health care What are the common sides affects of pre eclampsia after birth? How will it effect me long term Will the fact i suffered preeclampsia and eclampsia have any lasting effects on my body? Are there likely to be any lasting problems for me after birth? How will it effect my baby How will this affect the Baby? What are the chances of having high blood pressure problems in later life related to High blood pressure in problems in later life related to High blood pressure in problems in later life related to High blood pressure in problems, 2 x post partum pre-eclampisa, 2 x post partum pre-eclampisa, and then high blood pressure in pregnancy. Hhad HELP and as a result my son died. I went on to have sow healthy daughters. I'm worried about their pregnancies. Have things changed? What exactly are the continued risks of this, and prognosis for the future? Pland will having pre eclampsia affect me in the future Will suffer from high blood pressure in pregnancy. I had the continued risks of this, and prognosis for the future? What exactly are the continued risks of this, and prognosis for the future? What will having pre eclampsia affect me in the future Will suffer from high blood pressure in pregnancy. Ong term effects on health What are the long term health consequences for women who have had high blood pressure in pregnancy. What effect will every high blood pressure in pregnancy. What effect will every high blood pressure in pregnancy what effect will every high blood pressure in pregnancy what effect will every high blood pressure in the future. What are the long term health consequences for mombe and baby in the future what are the implications for the baby and for me in the future Whil it has future to my be and wascular demential in later life tel	20th June 2019	1=	Association between hypertensive disorders of pregnancy and the development of offspring mental and behavioural problems: A systematic review and meta-analysis. Dachew BA, Mamun A, Maravilla JC, Alati R. Psychiatry Res. 2018 Feb;260:458-467. doi: 10.1016/j.psychres.2017.12.07. Epub 2017 Dec 14. Review.48. A systematic review of the relationship between severe maternal morbidity and post-traumatic stress disorder. Furuta M, Sandall J, Bick D.BMC Pregnancy Childbirth. 2012 Nov 301;21:25. doi: 10.1186/1471-2393-12-125. Review.	Reproductive health and childbirth Mental health	What are the long term physical and mental health consequences of pregnancy hypertension (including pre-eclampsia) for the woman, baby and family? How can we predict and prevent shorter term complications of pregnancy
	50	How can we predict compilications of pregnancy hypertension (progression to pre-eclampsia)? How can we better prevent stillbirth in pre-eclampsia? What interventions are effective and safe at reducing fetal growth restriction in women with pregnancy hypertension?	pre-ectampsia consistent and predictable across all women or do some develop symptoms quicter than others? Now can we predict and prevent preechampsia in women with chronic hypertension? How can we predict and prevent preechampsia in women with chronic hypertension? How can we predict which women will be affected by severe pet? Prediction of severe PET? Are there any emerging predictors for complications of severe PET? Are the two men who will get sicker Tests to predict both wow will get sicker Tests to predict both who will develop high BP in pregnancy and once it develops, who is at greatest risk of complications need better quality studies of tests to predict both who will develop high BP in pregnancy and once it develops, who is at greatest risk of complications need better quality studies of tests to predict outcomes, in particula avoiding treatment paradox Predicting the course of establised pre-eclampsia avoiding treatment paradox Predicting the course of establised pre-eclampsia. There are recent studies aiming to predict clinical outcomes for women when they initially present with early features of pre-eclampsia. Measurement of angiogenic factors may play a role in this regard in the future but is still at a research stage 1650. How can we better prevent stillibirth in preeclampsia, What are the best medications of the outcombiling blood pressure in pregnancy, both for short term and longer term benefits for mother and bably mortality compared with bables born at the same gestation without maternal high blood pressure Risk of NEC / optimal feeding regimen How does Pital affect arterial Doppler pressures in pregnancy and at what point is feetal medicine scanning required What are the risks of developing hypertension later in life following pre-eclampsia What are the pisks of the pre-eclampsia	20th June 2019	2= 2= 2=		Reproductive health and childbirth Reproductive health and childbirth	hypertension (including stillbirth, fetal growth restriction, neonatal death, progression to pre-eclampsia)?
	50	What is the best screening test for pre-eclampsia?	syndrome - how can we prolong inutero gowth in those with IUGR - Saiddenafil does not appear to be safe Can you prevent IUGR due to high blood pressure What screening is in place to predict preeclampsia? What is the best way to screen women for high blood pressure in pregnancy? Should all first time mother be excreened for symptoms? What screening could help - ge I had HELP but because my bp wasn't raised it wasn't identified early. Luckily my baby was ok bu had clearly been growth restricted what is the best screening test for women who develop PE What is the best screening test most predictive of pre eclampsia in later pregnancy! Indicators of someone who will develop PET pre/early pregnanc (with aim to prevent) Could we identify women Pre-pregnancy who might be at risk of PE, and institute measures to reduce this risk	t	3	Preeclampsia Screening: Evidence Report and Systematic Review for the US Preventive Services Task Force. Henderson IT. Thompson JN, Burda BU, Cantor A JAMA. 2017 25;317(16):1668-1683. doi: 10.1001/jama.2016.18315. Review.PMID:28444285 Serum screening with Down's syndrome markers to predict pre-eclampsia and small for gestational age: systematic review and meta-analysis. Reproductive health and childbirth	What is the best screening test for pre-eclampsia?
	50	Following pregnancy hypertension, what is the best way to prevent future long term problems?	How we stop complications being passed onto baby How can we reduce life long effects on the mother is there anything I can do to stop blood pressure rising in future specific to mechanisms of pre-eclampsia causing high BP. no! buts regular hypertension e.g. DASH diet, exercise? How can the long-term effects this be reduced? Preventative strategies for future cardiovascular disease in later life by patients and health care providers as to the need for closer follow-up and illestyle modifications to better manage risk factors for cardiovascular disease is required.	,	4		Reproductive health and childbirth	following pregnancy hypertension, what is the best way to prevent future long term problems?
	50	What is the cause of pregnancy hypertension (including pre- eclampsia)?	What are the causes of high blood pressure in pregnancy Why does it happen Why date at the causes what causes high blood pressure in pregnancy when I have never had blood pressure problems in the past? Why does it happen Why dd I suffer with hypertension in my pregnancy? When I do not smoke, drink, not overweight 1 am not over 33 and do not fit any of the 'types' that I was told would be likely to have hypertension? What causes preceampisa What causes high blood pressure in pregnancy? What causes is the what causes it what causes preceampisa Why it happens? Why did jet it? What causes high blood pressure in pregnancy? Why are women in their first pregnancy at greater risk of pre-ecdampisa that women in their second or subsequent pregnancy at greater risk of pre-ecdampisa that women in their second or subsequent pregnancy at greater isk of pre-ecdampisa that women in their second or subsequent pregnancy at greater pre-ecdampisa What causes high blood pressure in pregnancy? It is possible that kidney function during pregnancy could be a major factor in blood pressure rising? Why does high blood pressure sometimes lead into Pre Eclampisa? What causes it (Wenteck sect? Why does happen?) What are the reasons for the blood pressure increasing? What causes women to have high blood pressure in pregnancy? What causes it were function what is the primary cause? What causes it they do some women get it and others dont ineed to understand how hypertension affects liver function What is the primary cause? What causes it why does not women women get it and others dont ineed to understand how hypertension affects liver function what is the pathophysiology of the disease? What causes it Why does me women get it and others dont ineed to understand how hypertension affects liver function what is the pathophysiology of the disease? What causes it why do some women get it and others dont ineed to understand how hypertension aff		5		Reproductive health and childbirth	What is the cause of pregnancy hypertension (including pre-eclampsia)?
	50	How can pregnancy hypertension (including pre-eclampsia) be prevented in a subsequent pregnancy?	What can I do to prevent preclampsia? (I was a healthy first time mom with good BPs until around week 36, so It wasnAc&_AliAg&2AjAf t prior history for me.) How can it be prevented What are the best ways to help keep blood pressure down in pregnancy is high blood pressure in pregnancy ever preventable and how? Will it were be preventable is there anything that can prevent / reduce risk high BP Wha can be done to prevent high blood pressure in pregnancy? Are there any risks involved with preventable measures (for baby and mother) Could I have done anything to prevent HELP syndrome? Can women have doctors inform them of all the risks that we must be aware of and what to do after a high risk pregnancy to reduce our higher risks and refer us for follow ups for the yrs to come. How can we prevent this condition? What advice can be offered to women who have experience dhigh blood pressure due to pre-eclampsia in one pregnancy who want yo go on to have more children? Has research identified women who might be prone to high blood pressure in pregnancy? What was the cause of my high blood pressure, could I have done anything to prevent it? Could I have done anything to prevent this happening? What is the most effective antihypertensive for control of postnatal hypertension Can it be identified earlier now What can you do to prevent pre-eclampsia from developing? How can you reduce risk of getting hypertension? why does high blood pressure start for some people during pregnancy but not others? What can I do to reduce pregnancy related high be gidn't have a high be before pregnancy? How can we prevent it is there any progress on prevention of high blood pressure? Are there more drugs being developed to help reduce high B Pudin pregnancy? What is the can be offered to be preduce the high B Pudin pergnancy to the prevention of high blood pressure? Are there more drugs being developed to help reduce high BP during pregnancy to the prevention of high blood pressure? Are there more drugs being developed to help reduce high BP		6	Calcium supplementation during pregnancy for preventing hypertensive disorders and related problems. Governmentation for improving maternal and neonatal outcomes in hypertensive disorder of pregnancy: a systematic review. Gul S, Jai J, Niu, S Bai Y, Zou H, Deng J, Zhou RJ. Renin Angiotensin Aldosterone Syst. 2014 Mar;15(1):88-96. doi: 10.1177/1470320313475910. Epub 2013 Feb 22. Review. PMID:23435582 Antioxidants for preventing pre-eclampsia. Rumbold A, Duley		How can pregnancy hypertension (including pre-eclampsia) be prevented in a subsequent pregnancy?
	50	managing women with pregnancy hypertension?	Could all doctors and midwifes be educated to be able to take on high risk pregnancy as a law and not send pregnant women home from them presenting at the emergency department or routine check ups without getting another Doctor/ Who is trained to have complete knowledge in high risk pregnancies in all the condisions to second it of a be thinking they should be of to go home without question that not admitting them will be safe for mother and baby and not be aloud to ever gamble on our safety. If there's a tall of booth is should be law to keep them monitored? Will they ever put in place that only medical professionals that get trained first in pregnancy medical care and to put most of the knowledge and focus only on pregnancies and if they make a wrong medical decision they get retrained before allowed to work with pregnant woman, holding the lives of our future, the babies we carry in hands of anyone not fully varianed to act with caution every time and if they make a 2nd wrong in their position they get removed from that position for life? The midwife curriculum; is hypertension in pregnancy given a significant amount of time and the potential further risk of pre-eclampsia and tELIP studied in depth? What investigations should be undertaken in pregnancy to exclude a secondary cause for chronic hypertension (diagnosed in the first 20 weeks of pregnancy?) 20 women with preeclampsia and nephrotic syndrome range proteinuria require		7			What are the educational needs of healthcare professionals managing women with pregnancy hypertension?
	50	What is the best way to diagnose pre-eclampsia promptly?	How can pre-ectampsia be diagnosed earlier in pregnancy? Now early could preectampsia be detected? Can it be identified earlier now is there a specific test that can diagnose pre-ectampsia from PIH with/without protenuria Are there an yet etil-etil earlier in the signs that could alert health professionals earlier? Is there confusion in diagnosing PIH from pre-eclampsia and is this having a negative effect on management/outcomes. Eg wrongly diagnosed PIH as pre-eclampsia causing ittragenic preterm birth How can the condition be best identified my wife had eclampsia twice, 1st time stopped in 1995 with magnesium sulphate from Uverpool royal - she was in Arrowepark hospital, fitted for hours and on life support, what progress is there that women no longer suffer as she did re blood pressure, testing for conditions masking eclampsia or pre-eclampsia? In early lost watched her suffer and nearly die. The differences between pregnancy induced hypertension and pre eclampsia, when do we treat them the same. Differentiatin pre existing proteinuric hypertension from superimposed preclampsia is it pre-eclampsia with its the best test to diagnose preclampsia earlier in pregnancy? How soon can high BP be diagnosed in pregnancy and what can be done to improve and hasten diagnosis rates? Proteinuria: at present there is insufficient data to recommend using urinary albumin/creationier act bout this may change when more research becomes available [13,16], such as the results of DAPPA (Diagnostic Accuracy in Pre-eclampsia withe its suspected. Next should be used routinely as a rule out test at this stage, though PIGF testing may prove useful in selected groups in future studies. Such tests should NOT be employed routinely in clinical practice until further clinical studies are conducted Diagnosis of pre-eclampsia when it is suspected.		8		Reproductive health and childbirth	What is the best way to diagnose pre-eclampsia promptly?

	50	What is the hest way to manage pre-eclamosia?	Why can't we move around during labor if we have high blood pressure? (If loving	20th June 2019	q=		Reproductive health and childhirth	What is the hest way to manage pregnancy hypertension (including ontimal
	50	What is the optimal antihypertensive medication to use postnatally?	Why can't we move around during labor if we have high blood pressure? (If loving relieve stress for us, wouldn't it be better to do that?) How dangerous is it? What is preeclampisa? What causes this? Why that line? My blood pressure was high so normally, always has been, and changed very little in pregnancy, but I felt I had to take medication because I went over a threshold. If I distarted with a lower pressure and changed the same, I wouldn't have been. Is the threshold for dranger the same for everyone? I would of liked to of known the importance of having your blood pressure taken during pregnancy. Why is happening? I'm interested in why this occurred in last trimester (was 25 years ago!) What is the difference between high blood pressure in pregnancy, to casemia of pregnancy and pre eclampsia? How high is too high How can I reduce my blood pressure in one pregnancy. Why did it experience high blood pressure in one pregnancy and pre eclampsia? How high is too high How can I reduce my blood pressure to inthib to be inthe pregnancy. How dangerous is high BP in pregnancy How can this be managed effectively and safely Why is high blood pressure an indicator of pre-eclampsia? How do better track what is "my normal". I had severe PE and the two normal midwife appointment readings before I collapsed were high for me, but not quite in the official "high" banding. We put it down to mork and running late for the appointment and it wasn't otherwise followed up. Perhaps it might have helped to have measured against my normal? During my first pregnancy! always had high blood pressure, which unfortunately resulted in preeclampsia. However was considered a normal side effect up until things became serious. Why is a high BP considered abnormal? How can it receives no in regnancy or why what a high blood pressure end not seen the control high high blood pressure and the wasn't otherwise followed up. Perhaps it might however was considered a normal side effect up until things became serious. Why has a high BP considered abno			pregnancy and postpartum: a systematic review.Firoz T, Magee LA, MacOonell K, Payne BA, Gordon R, Vidler M, von Dadelszen P; Community Level Interventions for Pre- eclampsia (CUP) Working Group.BJOG. 2014	Reproductive health and childbirth Reproductive health and childbirth Cardiovascular	What is the best way to manage pregnancy hypertension (including optimal antenatal and postnatal antihypertensive medication and optimal timing of delivery)
	50	What is the optimal timing of delivery in women with pregnancy hypertension?	baby was born)? What is the best way to treat women with pre eclampsia what are the best medications for controlling blood pressure in pregnancy, both for short term and longer term benefits for mother and baby? Should treatment of rhornic hypertension in a pregnant woman be different to pregnancy induced hypertension? If So, how? Which are the best antihypertensives available to treat postspartum hypertensions after preeclampsia diagnosis. What medications are best for postpartum blood pressure control? What is effective drug. Why do different clinicians use different antihypertensives for different patients? Are beta blockers superior to other antihypertensives is the ullicentrolled or not. If yes what drugs are used and how many What is the best antihypertensive for use in managing postpartum hypertensions is polypharmacy for ver high BP better than increasing the dose of one medication? How to decide on best antihypertensive for individual patient is there any henefit to RASA Grugs postpartum in women who have had pre-eclampsia? Are there any developments in new medication? How effective is oral hydrazaline vs labetalol and infedigine in treatment of high blood pressure. Do women with mildly elevated blood pressure alone really need an induction of labour? When is the mothers well being more important than the baby? Early induction etc? When is the mothers well being more important than the baby? Early induction etc? When is the mothers well being more important than the baby?			Sep;121(10):1210-8; discussion 1220. doi: 10.1111/1471- 0528.12737. Epub 2014 May 16. Review.PMID:24832366 Prevention and treatment of postpartum hypertension.Magee L, von Dadelszen P. Cochrane Database Syst Rev. 2013 Apr 30(4):C10004351. doi:10.1002/14651888.C1004351.pub3. 	50	How does the placenta contribute to pre-eclampsia?	is there any known link between prolonged hyperemesis and placental problems (leading to high blood pressure)? Are there any links to placental problems/lugr relating to incompatable maternal/paternal blood types? Is the fetus affected by the disease itself other than decreased placental function! If the placenta is the cause of PET, then why after 3 weeks do some women return with PET? What are the risk factors to have placental insufficiency in relation to preclampsia? What are the risk factors to have placental insufficiency in relation to preclampsia? What causes the placental problems linked with high blood pressure/PET is placental morphology related to maternal cardiovascular function in PE		19		Reproductive health and childbirth	
	50	What is the effectiveness and safety of pharmacological treatments once pre-eclampsia is diagnosed?	Is there a study using Vagra? (this was mentioned to me when I was pregnant 3 years ago and suffered high blood pressure) When gestational hyperinsion is first developing what should hcps recommend to slow its progression How does Aspirin help prevent some of the problems for the unborn baby? If a more common use of Mag Sulphate prior to seizures would be helpful. What is the best way to treat women with pre eclampsia Can we improve prediction, monitoring and treatment of HPI and pre eclampsia Does magnesium sulphate contribute to paralytic ileus? What is the best dosage and least amount of time needed to the paralytic ileus? What is the best dosage and least amount of time needed to treat patients with magnesium sulfate postpartum? Better treatments to prevent and treat pre-eclampsia What is the best management of pre-eclampsia? How can we manage high risk pregnancies for PET better to reduce preterm birth? What is best practice for use of magnesium sulphate Need for trials of new chemical entities to treat early onset severe pre-eclampsia Management principles (PEP.Distinctions between early and late onset, and mild and severe pre-eclampsia, may be useful for research purposes [3]. However, for clinical purposes, the condition should be considered as one that is at any time capable of being severe and life-threatening for mother and baby [84]. As such, either approach [to the duration of postspartum magnesium sulphate therapy] is reasonable but until further studies confirm these fieldings in other populations, we recommend continuing MgSO4 for 24 h. post-partum		20		Reproductive health and childbirth	N/A
