

# Palliative and end of life care Priority Setting Partnership

## OUR FIRST NEWSLETTER

This is the first newsletter for the Palliative and end of life care Priority Setting Partnership with the James Lind Alliance. You might be surprised to hear from us now, as the final report of the project was launched in January of this year. However, we believe that finalising the questions raised by carers, patients and professionals was only the first step in a much longer process, which aims to get these questions answered.

In this newsletter you will find a link to the full report which was published this year and more on the exciting news that Marie Curie, in partnership with the Motor Neurone Disease Association and the Chief Scientist Office, have launched their biggest call which is directly focused on the priorities.

## Palliative and end of life care Priority Setting Partnership (PeolcPSP)

Putting patients, carers and clinicians at the heart of palliative and end of life care research

### Research Call focuses on Priorities:

**Marie Curie** has just launched its largest ever research call in partnership with the **Scottish Government Chief Scientist Office** and the **Motor Neurone Disease Association**, totalling £1,425,000.

All proposals must address research priorities identified by the PeolcPSP, ensuring that the research funded meets the unanswered questions which carers, patients and health care professionals identified as most important.
